Amaan Behlim

AI/ML Engineer | Generative AI | LLM | RAG | Machine Learning | Deep Learning

Location: Mumbai, India | Mail: itzamaanbehlim45@gmail.com | Phone: +91 7208547983
LinkedIn: linkedin.com/in/amaanbehlim | GitHub: github.com/BehlimAmaan | Portfolio: amaan-portfolio-blond.vercel.app/

Professional Summary

AI/ML Engineer with 2 years of experience building practical solutions in Machine Learning, Deep Learning, NLP, and Generative AI. Experienced in LLMs, RAG, AI Agents, and intelligent automation using Python and modern AI frameworks. Skilled in model development, optimization, and deployment.

Technical Skills

Programming: Python, SQL
Python Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn, OpenCV, NLTK, spaCy
AI & Generative AI: Generative AI, LLMs, RAG, AI Agents, Prompt Engineering
Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Hyperparameter Tuning, XGBoost, Random Forest, SVM
Deep Learning: CNN, ANN, RNN, LSTM, Transfer Learning
NLP & LLM: NLP, Transformers, Hugging Face, LangChain, LangGraph, Embeddings, Semantic Search
Vector & Retrieval: ChromaDB, FAISS, Sentence Transformers, Document Retrieval, RAG Evaluation
Backend & APIs: FastAPI, REST APIs
Cloud & Deployment: AWS, Docker, Streamlit, Model Deployment
Databases & Tools: MySQL, Microsoft SQL Server, Git, GitHub, Jupyter Notebook, VS Code

Professional Experience

MAK {Byte}(AI Solution Startup, India) – *AI/ML Engineer* *june 2024 – Present (Full Time)*

SMART ATTENDANCE SYSTEM

Tech Stack: **Python, Django, Django REST Framework, PostgreSQL, OpenCV, PyTorch (anti-spoofing CNN — uses a MiniFASNetV2 model)**

- Developed an AI-powered smart attendance system using Python, OpenCV, PyTorch, and CNN-based anti-spoofing with MiniFASNetV2 to automate attendance and prevent unauthorized access.
- Implemented AI-based identity and liveness verification achieving **89% accuracy**, improving the reliability of automated attendance processing.

RAG-BASED DOCUMENT RETRIEVAL SYSTEM

Tech Stack: **Python, LangChain, Gemini, Hugging Face Sentence Transformers, ChromaDB, RAG, LLM**

- Developed a RAG-based document retrieval solution using Python, LangChain, Gemini, Hugging Face Sentence Transformers, and ChromaDB to enable context-aware question answering over business documents.

- Built a RAG pipeline with document ingestion, recursive chunking, semantic embeddings, and vector search, integrating Gemini via LangChain to generate grounded, context-aware responses from business documents.

AI EXAM PROCTORING SYSTEM

Tech Stack: **Python, YOLO, OpenCV, MediaPipe, CNN, Deep Learning, Computer Vision**

- Developed a real-time AI exam proctoring system using Python, YOLO, OpenCV, MediaPipe, and CNN-based computer vision techniques.
- Implemented face detection, multiple-person detection, phone/object detection, and head-movement analysis.
- Achieved **92% detection accuracy** while enabling automated real-time monitoring of examination sessions.

Wow Infobiz(IT Solutions, India) – *Machine Learning Engineer* *jan 2024 – May 2024 (Internship)*

- Developed and contributed to Machine Learning, Deep Learning, NLP, Generative AI, and RAG-based applications, including an LLM-powered AI career coach and recommendation systems.
- Implemented ML algorithms including Linear Regression, Logistic Regression, Decision Trees, Random Forest, XGBoost, AdaBoost, CNN, and RNN for practical prediction and classification tasks.
- Performed data preprocessing, feature engineering, model training, model evaluation, and optimization using Python and machine learning frameworks.

Personal Projects

- AI-Powered Multi-Agent Research Assistant | View

  Tech Stack: **Python, LangGraph, LangChain, Gemini, RAG, ChromaDB, Hugging Face**

  Developed a multi-agent AI research assistant that automates web research, information retrieval, analysis, and report generation. Implemented a RAG pipeline with ChromaDB and Hugging Face embeddings to provide context-aware responses from retrieved information.

- AI Video RAG Chatbot | View

  Tech Stack: **Python, Whisper, LangChain, ChromaDB, Hugging Face, RAG, LLMs, Streamlit**

  Built an AI-powered video assistant that transcribes video/audio content using Whisper and enables users to interact with the generated transcript through a RAG-based conversational interface. Implemented document chunking, Hugging Face embeddings, ChromaDB vector retrieval, and LLM-based question answering, with support for summarization and extraction of key information from video content.

- AI Movie Recommendation System | View

  Tech Stack: **Python, Pandas, Scikit-learn, NLP, TF-IDF, Cosine Similarity, Streamlit**

  Developed a content-based movie recommendation system using movie metadata and NLP techniques. Applied TF-IDF and cosine similarity to identify similar movies and generate personalized recommendations across a dataset of 45,000+ movies.

Education

- University of Mumbai - *India* *June 2022 – May 2026*

  Bachelor of Engineering In Computer Science and Engineering (AI/ML) with Honours in Data Science
